ABRAHAM BALDWIN AGRICULTURAL COLLEGE

Choosing a College

Each year thousands of young men and young women in Georgia face the problem of choosing their college. This is an important decision and should be given careful thought. In arriving at a conclusion, you, as a prospective student, should consider a number of factors.

First, you must decide if you want training for a specific vocation. If so, you should plan to attend a college giving training in the vocation of your choice. If you wish to be a lawyer, attend a college offering training in law; if you wish to study medicine, start off taking a pre-medical course; if you have chosen agriculture as your vocation, you should enter an agricultural college; if home economics is your chosen field, you should enter a college majoring in home economics, and so on.

Second, the college you choose should be a recognized college.

Third, you should choose a college for other advantages, as its recreational life, its social life, its cultural life, and those items of college life which make college a pleasant place in which to live as well as a place in which to receive training.

Fourth, you should choose a college, other things being equal, that will furnish the desired training and other advantages at a minimum cost. Money is an important item and money saved in training will mean added capital as you start your vocation.

This bulletin is prepared to acquaint you with the offerings of Abraham Baldwin Agricultural College. If, after reading it, you decide that Abraham Baldwin is the college that will come nearest to meeting your needs, we will be glad to have you make application for admission.

Training

Objective: Abraham Baldwin Agricultural College offers its students vocational courses in agriculture and home making. The college was founded in order to give training that will enable young men to be more efficient farmers, young women to be more efficient home makers, and training that will make a better Georgia through having well rounded citizens return to the rural sections of the state.

Description of Courses

All courses offered are planned with the aim of the college in mind. Students are sectioned according to experience and previous training in order that the student may receive the maximum benefit from his or her courses.

Agricultural Course

Abraham Baldwin Agricultural College has the best of facilities for teaching agriculture. Adjoining the college is the Georgia Coastal Plain Experiment Station. On the 1500 acre tract the students study the most efficient methods of farming in the growing of crops and the production of animals. The staff of the Station assist the faculty members of the College in giving the students the benefit of the latest experimental results.

In addition, the college is located in the best extensive farming area of Georgia. Practically every agricultural enterprise is profitably grown in this area, and practices for the successful carrying-on of these enterprises can be studied.

Farm Management 1: 5 hours. The subject matter in Farm Management is built around the home practices, state practices and practices of successful farmers in the production, utilization, and marketing of farm commodities. First year.

Animal Production 1: 12 hours. Three lectures and one laboratory weekly for three quarters. The best practices in the critical jobs of production and marketing of beef cattle, dairy cattle, hogs, and poultry are studied. Three recitations and one lab-

ADMINISTRATION BUILDING

cratory period are held weekly throughout the year in order that seasonal practices may be studied. Second year.

Crop Production 1: 12 hours. Three recitations and one laboratory weekly for 3 quarters. The best practices in the critical jobs of production and marketing of the more common crops are studied. Seasonal practices are followed by having three recitations and one laboratory period held weekly throughout the year. First year.

Soils 1: 6 hours. Five lectures and one laboratory. The subject matter covers the physical and chemical properties of soils, a study of the more common types of soils, the fertilizer requirements of various soil types, and the best practices in soil management. Second year.

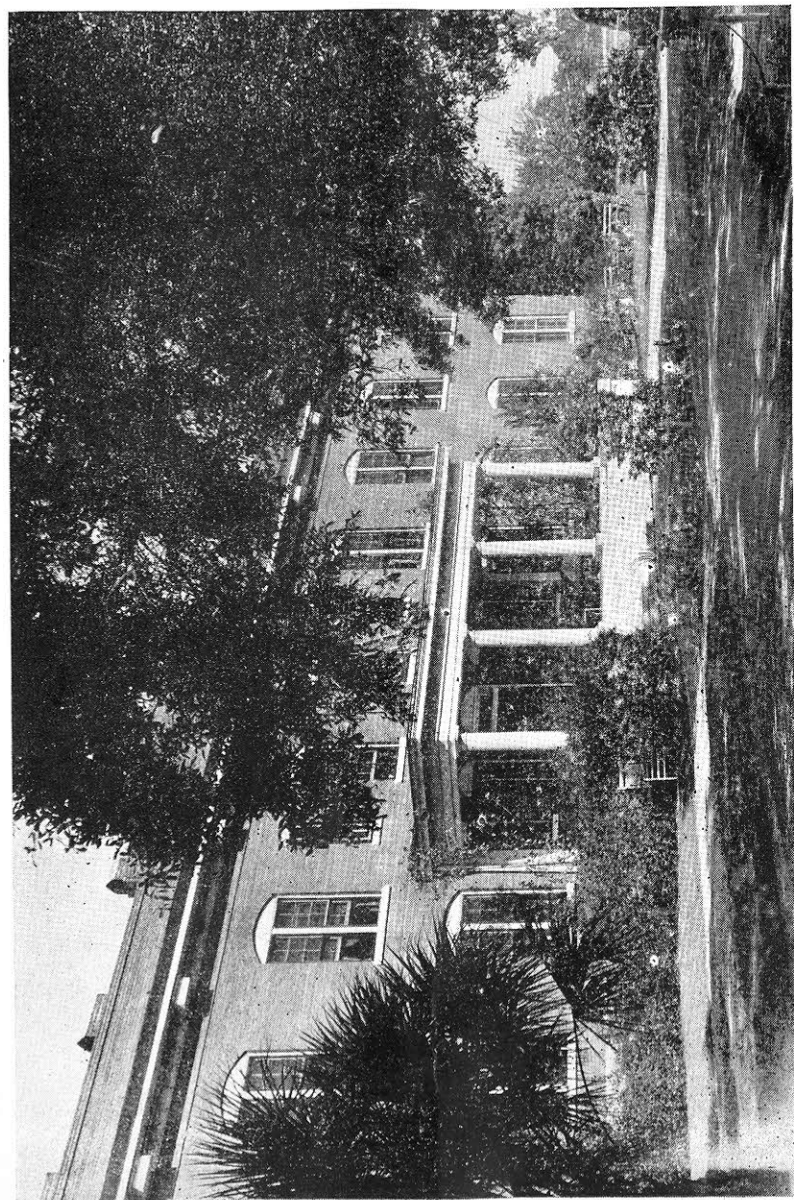

Forestry 1: 5 hours. Four lectures and one laboratory period. Deals with elements of forestry management, including tree identification, forest production, forest care, measurement, and the harvesting and marketing of forest products. First year.

Farm Mechanics 1: 5 hours, lectures and laboratories. Theory and practice in: Woodworking and Carpentry, Paints and Painting, Forge, Concrete, Farm Machinery and Equipment, Soil Conservation, Soldering. First year.

Farm Mechanics II. 5 hours, lectures and laboratories. Theory and practice in: Terracing and Gully Control. Farm Building Construction. Second year. Elective.

For those students wishing to specialize in Forestry and Agricultural Engineering, advanced courses will be offered with the course of study made up to fit the future plans of the student.

Elective: Feeling the importance of having the farmer trained in some of the other vocations in order to save him money on his own operations and to aid him in part-time employment, we are offering for the first time courses in brick-

LEWIS HALL—DORMITORY FOR GIRLS

laying, plastering and carpentry. These courses will be open to all second year men and special students on a non-credit, elective basis.

Home Making Young women receive training that will enable them to maintain an efficient home. Lack of dormitory space limits the number of girls to ninety which assures close personal supervision. The course is made effective through the use of a fully equipped home unit.

Home Economics 1: 5 hours. Lecture. An introduction to the study of Home Economics and problems of living on the campus. First year.

Foods 1: 5 hours. Two lectures and three laboratories per week. A course in cooking including meal planning, meal preparation and table service, and demonstration cookery. First year.

Clothing 20: 5 hours. Two lectures and three laboratory periods per week. A course teaching the selection, purchase, construction, and care of clothing and appropriate dress. First year.

Elementary Textiles: 5 hours. Three lectures and two laboratory periods. A study of raw material, the construction and identification of fabrics, and their choice and use. Second year.

Art Survey 30: 5 hours. Lecture. A course designed to develop art appreciation and good taste in the application of art principles. First year.

Home Furnishing: 5 hours. Prerequisite, Art 30. A study of the intelligent selection of household furnishing. Second year.

Home Management: 3 hours. A study of the social, economic and health problems which confront the family. Second year.

Science The science courses at Abraham Baldwin are taught from two approaches. The basic knowledge of science that should be part of the knowledge of a well informed citizen is taught as is the science with more direct applications to the problems of the farmer and home-maker.

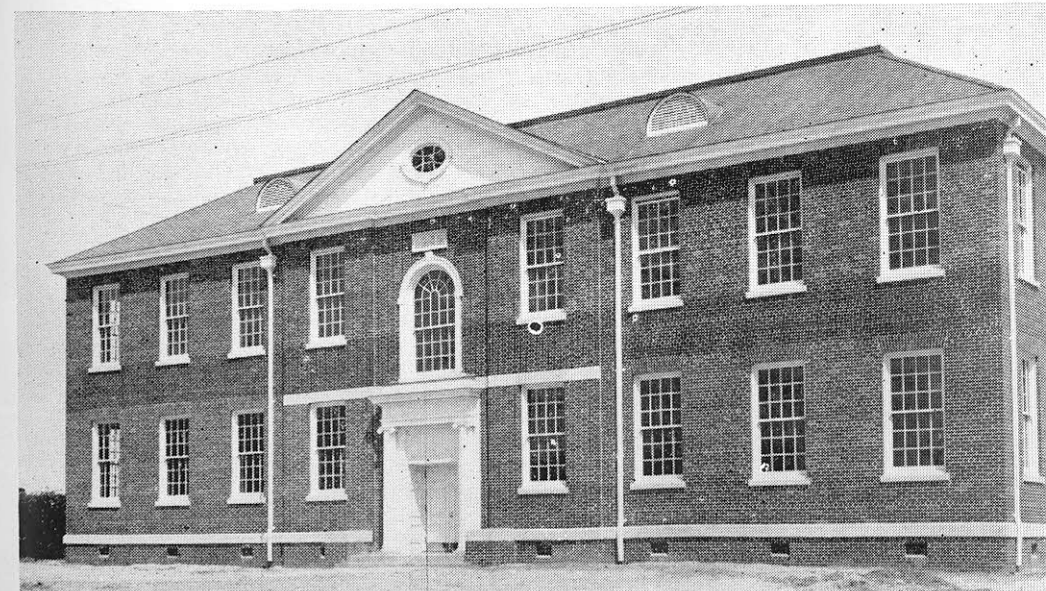

Botany 1: 5 hours. Four lectures and one laboratory period. A study of the physiological make-up and the economic significance of plants. First year.

Botany 2: 5 hours. Four lectures and one laboratory period. A continuation of Botany 1, noting the relationships, characteristics and economic significance of each division. A brief introduction to Plant Taxonomy is included. Second year.

Biology A: 5 hours. Four lectures and one laboratory period. This course is given to young men and deals with the health problems of the individual of the rural home and of the rural community. Second year.

Biology 101-102: 10 hours. For women. This course is

LIBRARY BUILDING

Physics: 5 hours. Four lectures and one laboratory period. A study of some principles and simpler applications of physics along with a history of the development of physics. Second year.

The Arts English and Social Science are taught from the standpoint of the well informed citizen. The literature and social problems of rural life are given special emphasis.

English 101-102: 10 hours. Grammar and composition. First year.

English 203: 5 hours. A continuation of English 1 with special emphasis on oral English. Second year.

Humanities 201-202: 10 hours. Designed to develop in the student some knowledge and appreciation of literature, music, painting, sculpture, and architecture. Second year, women.

SOUTH GEORGIA OFFERS OPPORTUNITY FOR STUDY OF LIVESTOCK.

designed to give the students a survey of the fundamental parts of biology, including human anatomy, physiology, and the maintenance of health. Public health, genetics, and eugenics are stressed. First year.

Chemistry 21: 5 hours. Three lectures and two laboratories. General in scope, dealing with the chemical principles and the application of chemistry to the life of the citizen. First year.

Chemistry 24: 5 hours. Three lectures and two laboratories. Emphasizes the principles and applications of chemistry as related to the farmer or the home maker. Second year.

Mathematics 101: 5 hours. A study of the general field of mathematics dealing with special phases of arithmetic, algebra, geometry, and trigonometry. First year.

Note: Students failing to show sufficient understanding of arithmetic will be required to take special work before attempting Mathematics 101.

SHOP BUILDING IN WHICH BOYS STUDY JOBS IN FARM SHOP WORK.

WELTNER HALL
One of the Dormitories for Men

A Recognized College Abraham Baldwin Agricultural College is a unit of the University System of Georgia. Although training is given primarily for the farm and home, the young man or young woman wishing to continue in college after two years may enter other branches of the University System of Georgia teaching agriculture or home economics without loss of time or credit. That the college is recognized by patrons as being a desirable place to which to send sons and daughters may be seen from the enrollment figures, the total number of students attending having increased from 99 in 1933-34 to 445 in 1939-40.

Social Science 101-102: 10 hours. A brief study of the historical, political, economic and social factors molding modern civilization. First year.

Social Science 203: 5 hours lecture. Men. A study of American Government dealing with problems from local, state and national view-points. Second year.

Social Science 204: 5 hours lecture. Men and women. A study of Contemporary Georgia problems with special emphasis on sociological institutions. Second year.

No student will be allowed to take more than four subjects per quarter unless maintaining an average of C or better.

Other Features

Clubs

General: Club life is stressed. A beautiful log cabin club house is used by the various clubs. Clubs on the campus are:

1. **Saddle and Sirloin Club.** All young men interested in the production of live stock are eligible for membership in this club.
2. **The Future Farmer Club.** This organization is made up of those students who have belonged to a Future Farmer chapter in high school.
3. **The 4-H Club.** The club is composed of young men and young women who have belonged to 4-H Clubs before coming to college.
4. **Home Economics Club.** Young women in college are eligible to membership in this organization.
5. **Forum Club.** Students have an opportunity and are urged to develop skill in discussing current problems. This club is open to young men and women wishing to develop power of speech and thought.
6. **The Dramatic Club.** Dramatics engage part of the students time in their extra class work. The Baldwin Players present major plays throughout the year for the general public in addition to short skits and plays produced for the pleasure of the students.
7. **Forestry Club.** Young men majoring in forestry make up the personnel of the club.
8. **Engineering Club.** Young men interested in engineering make up the personnel of this club.
9. **Camera Club.** Those young people who make photography a hobby will enjoy membership in this club.

Musical

1. **The Glee Club.** The Glee Club gives every student a chance to exercise his or her talents in a musical way. This club makes about three week-end trips each spring.

2. **The Orchestra.** New students are urged to bring their musical instruments.

Religious Life

1. **Vespers.** The religious life on the campus is conducive to the building of character. Vespers are held each Sunday evening and students attend the young people's religious organizations of their choice. The most active of these organizations are the Epworth League and the B. Y. P. U.

2. **Church Attendance.** The religious life of the student is also enriched by the co-operation of the Tifton churches in providing transportation for students into Sunday School and church.

Recreational

1. **Intra-mural.** The college fosters one of the strongest intra-mural programs in the state. Baseball, basketball, touch football, tennis, badminton, volley ball, hand ball, and diamond ball are the sports engaged in by the boys in the intra-mural program. Girls may participate in tennis, diamond ball, volley ball, and other games of their choice.

2. **Inter-Collegiate.** Basketball, baseball and tennis are the three inter-collegiate sports of the college. A skilled recreational director is in charge of both programs, intra-mural and inter-collegiate.

Library

Practical instruction is aided through the use of the library which contains approximately 10,000 volumes. A trained librarian is in charge to assist students in finding material needed.

Location

Abraham Baldwin Agricultural College is located at Tifton, Tift County, in the southern part of Georgia.

FERRING HALL—BOYS DORMITORY

Tifton is a beautiful little city with a population of approximately 8,000, located in one of the best farming sections of the South. Its beautiful homes, splendid churches and hospitable citizens make Tifton an exceptionally wholesome and attractive place in which to live.

Expenses

Since the college is operated on a quarter basis, a summary is given here of the expenses for one quarter. **The college reserves the right to change the charges for room, board and fees at the beginning of any quarter.**

Summary of Expenses for One Quarter

1. Fees	\$20.00
2. Room Rent	12.00
3. Table Board	36.00
4. Books and Supplies (Estimated)	5.00
5. Laundry (Estimated)	3.00
<hr/>	
Total Expenses	\$76.00

It can be seen from this summary that the average cost for the regular term of three quarters is less than \$230.00.

1. All charges for fees, room rent, and table board are payable quarterly in advance.

2. All checks should be made payable to Abraham Baldwin Agricultural College.

3. After two weeks no refunds will be made for less than one month.

4. Students furnish their own bed covering, pillows, towels, and personal articles. Rooms are equipped with beds, dressers, tables, chairs, heat, and light. Students will be held responsible for any damage to property in their rooms.

5. A room reservation fee of \$4.00 is charged. This is credited on expenses of first quarter. Due to limited dormitory facilities early application should be made.

Other Information

Rules and Regulations

Regulations are set up to maintain the health, the scholarship, and the moral integrity of the students.

1. No drinking of intoxicants.
2. No gambling.
3. No hazing.
4. No cheating.

Students breaking any of the above four rules will be asked to drop from college.

5. Students are required to be in their rooms at night at a reasonable hour.

6. At the end of each mid-quarter, students not doing a satisfactory grade of work will be required to attend study hall for the remainder of that quarter.

7. Young women will be allowed to go home only at the end of each quarter unless parents or guardian come for them.

Student Work

The college employs a limited number of students to assist in the library, as janitors, as dining hall and kitchen helpers, on the campus, garden, farm, and with the poultry. The Coastal Plain Experiment Station

furnishes employment to several in the dairy and in its experimental projects.

The college is eager to attract and encourage self supporting students in every possible way. As a matter of business, though, it can afford to employ only efficient help and to pay the customary wages. If a student desires an education and must work for it, as a rule, the wise way is to go to college after having saved a sufficient amount to meet expenses for two quarters. Then let the first job found be seized and done in such a way that the services will be regarded as valuable. If this is continued, there is every reason to expect that after the merit of the pupil is known, a sufficient amount of work will be available to assist the student to the extent needed.

While students are warned not to depend upon work to meet their expenses, many, during the last year, have found profitable employment at the college and at the Coastal Plain Experiment Station. About 50% of our students are reducing expenses by work.

This year a limited number of students have been assisted through the National Youth Administration program. These funds are administered by the President of the College, and must be given to needy students. Students who can manage their finances otherwise should not request these funds.

Students receiving work must maintain a passing grade in all subjects or their jobs will be taken from them.

Farm Supplies

Farm supplies, such as syrup, meats and vegetables will be accepted in payment of board. The prevailing farm price at Tifton on the day received will be the basis of payment.

Special Students

To be a regular student of Abraham Baldwin Agricultural College it is necessary that a student have his high school diploma. However, a student of mature years, upon examination by the faculty and upon the recommendation by his or her county agent, home demonstration agent, or vocational teacher, may be admitted as a special student and allowed to take courses warranted by his or her ability.

Summer Quarter

Features of the summer program are the camps for boys and the camps for girls that are held on the campus. No class-room work is offered during the summer.

Announcements

Short Courses: This year the college through the co-operation of Sears-Roebuck Company, is offering short courses at no expense to a limited number of farmers. Farmers are selected by the county agent or teacher of vocational agriculture for the courses, and farmers should make application through these agencies or directly to the president of the college. Farmers are required to bring their own bed clothes.

During the year courses will be offered on various enterprises, these courses lasting for one week. Among the units offered will be Crop Rotations and Practices, Hogs, Beef Cattle, Soil Conservation, etc. The class on Crop Rotations and Practices will begin June 17th and last through June 21st. A general course covering the main experiments carried on at the Georgia Coastal Plain Experiment Station will start September 2nd and will last for two weeks. Dates of other courses will be announced. For further details write the college.

Selected Student Body

On the back page of this bulletin is a blank on which to make application for admission. It will be noted that two references are required. Due to our limited dormitory facilities and for the sake of better instruction we want to enroll only those students interested in agriculture and home economics. In addition, we want as citizens at Abraham Baldwin Agricultural College only those students who have been desirable citizens at home. Due to the fact that our dormitory space is so limited it is advised that early application be made.
