General Information

Abraham Baldwin Agricultural College is a two-year institution of higher learning specializing in agriculture for young men and home economics for young women. The school, a unit of the University System, was established in 1933, and when it opened its doors 69 students were enrolled. At that time the institution could boast of a physical plant of only four buildings. Today the College has reached an enrollment of over 450 young men and young women and it has 12 major buildings in its plant.

Abraham Baldwin has many facilities for training in cultural, social, and recreational life which develop well-rounded citizens. Of major importance to rural students is the stress placed upon the development of leadership and of wholesome rural living.

Based on history, recognition, and success of students, the school is worthy of consideration by all high school graduates who are making a choice of a school of higher learning. Abraham Baldwin believes that as a state supported college, its plant and staff should be available to citizens of the state throughout the year. The College, therefore, operates on a full four-quarter schedule with the summer quarter an integral part of the college year.

Expenses at the College are as low as at any other junior college in the state. Work scholarships are available for students who need financial aid. If after you have read this bulletin you have decided that you would like to have training in fields of agriculture or home economics, we shall be glad to have you make application for admission.

VETERANS—Former members of the Armed Services desiring educational training in the field of agriculture may enroll in this institution under Public Law 346 or 16. During the past three years many veterans have completed two years of training at Abraham Baldwin and are now in senior colleges or have secured positions in various agricultural fields. One hundred seventy-six former members of the Armed Forces have enrolled here during the present school year.

TRANSFER OF CREDIT to the College of Agriculture on the part of young men and to any of the senior colleges specializing in home economics in the case of young women is possible be-

9 women
5 men

75

cause the college is a unit of the University System. This means that students wishing to secure degrees in agriculture or home economics may do so by attending Abraham Baldwin Agricultural College for the first six quarters and transferring to a senior unit for the last six quarters. **It will be of interest to such students to know that Abraham Baldwin graduates are the only graduates of any two-year college in the State who are admitted to the Junior class of the College of Agriculture with full credit.**

THE LOCATION is all that could be desired in an agricultural college. The school is about three miles north of Tifton, which is in the heart of the best and largest farming area of the State. Its campus is surrounded by the Georgia Coastal Plain Experiment Station with its 2,000 acres devoted to the latest problems in agricultural research. The first-hand results of the experiments are available to our students. On the Station experimental plots and in the area practically every southern agricultural enterprise is successfully grown.

THE HEALTH OF THE STUDENT is safeguarded by a required physical examination upon admission to college. Every precaution is taken to have a healthy student body and the

Weltner Hall—Residence for Boys

number during the year who are sick is negligible. The college employs a registered nurse and provides medical services to its boarding students in cases of minor illness, but the cost of medicine and the cost of a physician is the responsibility of the student. Also, the college assumes no responsibility for injuries received in voluntary or required activities.

EXTENSIVE IMPROVEMENTS to the physical plant are now in progress which will increase the efficiency of the college and will add greatly to the comfort of the students. A central heating plant, now being installed, will furnish steam heat for all buildings on the campus. A new kitchen, with modern equipment, will be in operation for the fall term. The administration building, the agricultural building, the auditorium, and the gymnasium have been re-decorated, and plans have been approved for a new dormitory for girls.

Campus Organizations

THE GLEE CLUBS function as a mixed chorus and as a men's and a women's glee club separately. They give one full concert each quarter, and in addition present chapel programs. Out of town concerts are presented in the spring quarter.

BALDWIN PLAYERS, the dramatic club of the college, presents one-act plays throughout the school year and climaxes its activities with a three-act play during the spring quarter.

HOME ECONOMICS CLUB is an organization open to all students who take courses in home economics. The aim of the club is to afford students an opportunity to become better acquainted with the social and professional activities of home economics leaders and provide for their own personal development through active participation in club programs.

Prominent among the other vocational activities on the campus are the **FUTURE FARMERS OF AMERICA**, the **4-H CLUB**, **SADDLE AND SIRLOIN**, and **ENGINEERS CLUB**.

TABAC, the college annual, is published by the students and the faculty advisers.

RELIGIOUS LIFE is well cared for. A vesper service is held each Sunday evening on the campus. M. Y. F., Student Service League and B. T. U. groups plan and produce the programs for the service. On Sunday morning the students attend Sunday school and church in the Tifton churches.

THE RECREATIONAL PROGRAM is set up for the entire student body. Emphasis is placed on physical fitness, but ample opportunity is given for baseball, basketball, tennis and volleyball. Swimming is a feature of the program. Skilled recreational directors are in charge of intramural and intercollegiate games.

ENTERTAINMENT COURSE. That the college community may be kept in touch with the best in music, art and current thought, an artist series is presented through the student activity fund.

Class Attendance

Regular class attendance is a student obligation. Absence from class or laboratory lowers grades and makes it more difficult to secure a passing grade. There are no excused absences or cuts from class or chapel except those necessitated by trips of athletic teams, the glee club, vocational clubs, religious organizations, illness certified by a physician, the dean of men, the dean of women, death or serious illness in the student's family.

Unexcused absences may at any time cause the student to be placed on probation or asked to withdraw from college.

Courses may not be "dropped". All schedule changes must be approved in advance by the dean of instruction.

Absences of young women are excused only by the dean of women or the President of the college.

Week-End Visits

One free week-end, exclusive of Thanksgiving, is permitted each quarter. On free week-ends the college closes at 11 a.m. on Friday. All students must return before 8 a.m. the following Monday.

Special Fees

Former students who enter after registration days will pay a fee of \$1.00 for each day until a maximum of \$5.00 is reached, unless the student has been unable to enter school because of illness. Such cases will be excused on a doctor's certificate only.

The college calendar is definite as to all opening and closing dates and dates for final examinations. Permission for early departure or late return cannot be granted.

General Assembly

Assembly is held each Wednesday morning at 9:45 in the college auditorium. Attendance is required. College life is here interpreted and in turn is expressed through student participation. The exercises are brief, but an effort is made to have them inspirational and helpful. Distinguished speakers and visitors are frequently present.

Rules and Regulations

Abraham Baldwin has set up a minimum number of rules and regulations for the maintenance of the health, the scholarship, and the moral integrity of the students.

The possession or use of intoxicants is prohibited.

There must be no gambling, hazing, or cheating. Dishonesty of any kind will receive a heavy penalty.

Fire arms, fire works of any kind, or any article that would endanger the buildings to fire or the occupants to accident or discomfort will not be allowed in the buildings.

Students breaking any of the above rules may be asked to withdraw from the college.

Students are required to be in their rooms at a reasonable hour.

Young ladies will be allowed to go home after classes for week-ends only upon the receipt of a written request from parents or guardians. This request must be addressed to the dean of women.

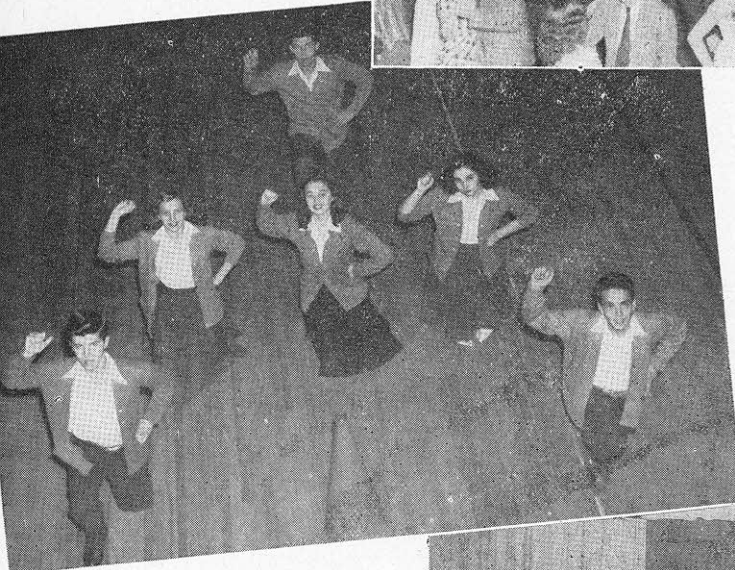

All women students whether residing in the dormitory or not are subject to the general social policies formulated by the committee on social activities.

The President may request the withdrawal of a student at any time because of unsatisfactory spirit, conduct, or scholarship without having to make specific charges.

LOANS ARE AVAILABLE to a limited number of students from the following sources:

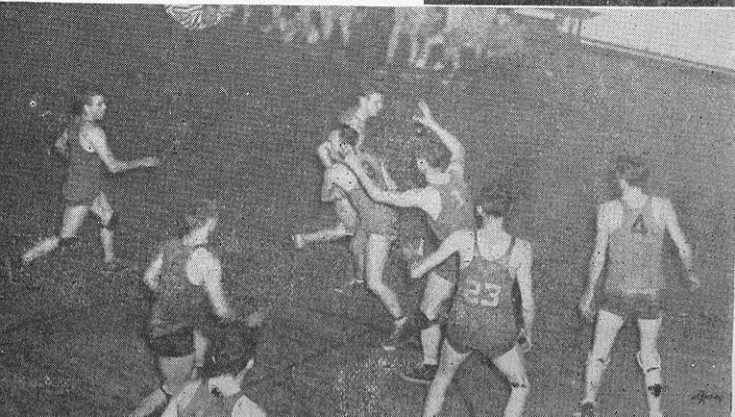

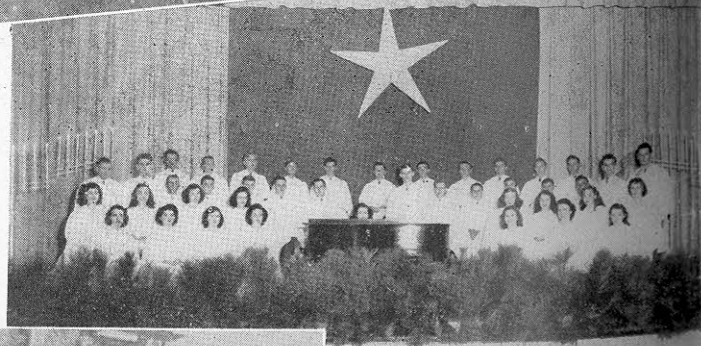

Baldwin's Extra-Curricular Activities

basketball

1. **BALDWIN LOAN FUND**—This fund is made up of miscellaneous contributions and is administered by the college.
2. **ROTARY LOAN FUND**—Upon recommendation of the college the Tifton Rotary Club will make small loans to students from its loan fund.
3. **RUTH FULWOOD WRIGHT LOAN**—Each year one second year girl may borrow \$125 from the loan fund established by Mrs. Ruth Fulwood Wright.

Freshman Week

Freshman week begins on Tuesday, September 21, at which time all new students should report to the college. Two days, the 21st and 22nd, will be devoted to introducing new students to the college atmosphere, the buildings and the library. Physical examinations and placement tests will be given before the completion of registration.

Second Year Students

Second year students will register on September 23. Classes will begin for all students on September 24.

Expenses

College expenses are payable in advance. Below is a schedule of costs by the quarter. **Note: All charges are subject to change at the end of any quarter.**

Matriculation fee (all students)	\$25.00
Activity fee (all students)	3.00
Non-resident tuition	50.00
Room (all students)	21.00
Board (all students)	90.00

The estimated costs of books and laundry are \$15.00 per quarter. Students who formally withdraw during one week following the scheduled registration date are entitled to a refund of 80% of the fees paid for that quarter; those who withdraw during the period between one and two weeks after the scheduled registration date are entitled to a refund of 60% of the fees

paid for that quarter; those who withdraw during the period between two and three weeks after the scheduled registration date are entitled to a refund of 40% of the fees paid for that quarter; those who formally withdraw during the period between three and four weeks after the scheduled registration date are entitled to a refund of 20% of the fees paid for that quarter. Students who withdraw after a period of four weeks has elapsed from the scheduled registration date will be entitled to no refund of any part of fees paid for that quarter.

A room deposit of \$5.00 must be made by each student desiring sleeping space in a dormitory. Of this amount \$2.00 is considered as a service charge; the balance of \$3.00 is held as a room damage deposit, refundable if the room is vacated in the same condition as that at occupation, reasonable wear excepted.

All students housed in the college dormitories are required to eat in the college dining hall, excepting those who may be required, for dietetic reasons, to have special treatment. Such applicants should be prepared to submit a statement from a physician, or from the college nurse. This, of course, does not apply to those living in housing units provided with food preparation facilities.

Regents' Scholarships for Honor Graduates

The Regents' Student Scholarships will be awarded to the number one student in the graduating class of the accredited high school which certifies him or her to Abraham Baldwin Agricultural College provided the graduating class consists of not more than 25 students; and scholarships may be awarded to both the number one and the number two students of the graduating class that consists of no fewer than 25 nor more than 40 students; and scholarships may be awarded to the number one, the number two, and the number three graduates of those schools having forty or more students in the graduating class.

Requirements for Residence

1. A student who does not earn credit in at least one course during any quarter shall not be eligible to register for the succeeding quarter.

2. Any student who fails to earn credit in at least two courses during the quarter shall be placed on probation for the succeeding quarter. This probation shall continue until the student has passed for one quarter a normal load of three courses.

3. A student while on academic probation must earn credit in at least two courses. One of these courses must carry a minimum grade of C.

4. Students dismissed for defective scholarship may again register after an absence of one academic quarter.

5. The courses referred to above are exclusive of the usual required courses in Physical Education.

6. Students who fail to meet the regulations as above set forth because of illness or because of properly permitted less than a normal load of work, may receive such special consideration as their cases merit.

7. While the summer quarter is to be considered as a regular quarter by those institutions who maintain a summer quarter, students are not to be excluded from this quarter under the action of the above rules, but are to be allowed to make up deficiencies in the summer quarter of the institution concerned or other approved Summer Schools.

8. The above rules constitute the minimum scholastic conditions under which students can remain in the college. It is understood, however, that a student may be dismissed for deficiencies in scholarship at any time, even though he is not excluded under the above rules.

9. GUESTS. Before a guest is invited to the college, arrangements must be made with the matron in charge of the dormitory where the guest is to visit. All guests are expected to conform to the regulations of the halls of residence. Meal tickets for guests must be purchased at the Business Office.

Description of Courses

A description of courses in Agriculture and Home Economics is given below. These courses are planned with the students' future in mind, both terminal and higher education being considered.

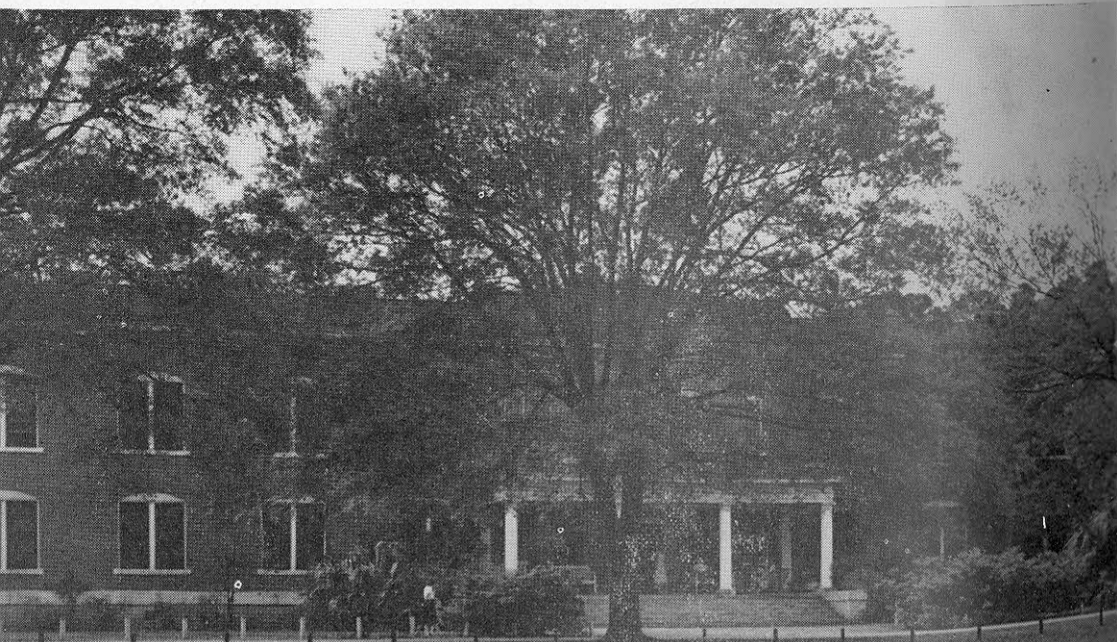

The agricultural course is made most efficient through the facilities present at the College and the Coastal Plain Experiment Station. Each course will be completed in one quarter. The lecture and laboratory hours given under each course are on a weekly basis.

Agricultural Economics 10: 3 hours. Three lectures or recitations. Orientation course in economics of agriculture. Purposes of the course are to give the student an understanding of the place of economics in agriculture and to develop methods of using economic facts and practices in solving farm problems. Second year.

Agricultural Engineering I: 5 hours. 3 lectures and 2 laboratories. Prerequisite, Agricultural Economics 4. Designed to give detailed information in solving problems related to soil and water conservation, terracing, gully control, land drainage, farm ponds, engineering drawing, farm water supply, sewage disposal, concrete, painting, rafter cutting, rural electrification. First year.

Agricultural Engineering II: 5 hours. 3 lectures and 2

Lewis Hall—Residence for Girls

laboratories. Theory and practice in operation, care and repair of farm machinery; principles of operation of gas engines and farm tractors. Second year.

Agromony I (Farm Crops): 5 hours. 4 lectures and one laboratory. Study of major field crops of Georgia, special reference to varieties, adaptation, fertilizer, rate of seeding, spacing, top-dressing, cultivation, disease and insect control, harvesting and marketing. Results of forage and soil improvement crops investigation of Georgia considered in the study and organization of the farm program. First year.

Animal Production I: 5 hours. 4 lectures and one laboratory. Introductory course in animal husbandry designed to acquaint the student with fundamental problems of livestock production. Includes kind of livestock, its place in farming, emphasis on marketing requirements, marketing methods, processing, merchandising, feeding, management and breeding of swine, beef cattle, dairy cattle, poultry. First year.

Elective
Animal Production II: 5 hours. 4 lectures and one laboratory. General course in livestock feeding and management, emphasis on practical farm rations for swine, beef cattle, dairy cattle, poultry. Second year.

Dormitory
Forestry I: 5 hours. 3 lectures and 2 laboratories. General agricultural forestry: tree identification, nursery planting, naval stores, measurements and volumes, treating of and uses of woods, environment, growth, culture, utilization and management are treated from standpoint of theory and practice. Course dealt with on farm basis throughout. First year.

Horticulture I: 5 hours. 4 lectures and one laboratory. General introduction to horticulture, emphasizing adaptation and relationship of horticulture to agriculture in general, together with its relative importance in Georgia. A study of the more important fruits and vegetable crops. Emphasis is placed on soil preference, cultural requirements, plant nutrient needs, practical insect and disease control, pruning, propagation, harvesting, grading, and general discussion of marketing as related to crop involved. Laboratory periods are related to practical work in pruning, plant beds, spraying, propagation and study of research work in progress at Coastal Plain Experiment Station.

Pauline
HOME MAKING COURSES offer young women training that will enable them to maintain an efficient home. Lack of dormitory space limits the number of girls to 100 which assures

close personal supervision. The course is made effective through the use of a fully equipped home unit and complete home economics department.

Equipment and Home Management: 5 hours. Two lectures and four laboratory periods per week, and a half-term residence in the home management house. This includes the care of the house and equipment besides planning, marketing and preparation of meals for a family sized group.

Foods 205: 5 hours. Six laboratory periods per week. A course in the study of foods for the family group including meal planning, preparation and service.

Home Economics I (Home Furnishings): 5 hours. Two lectures and three laboratories. Prerequisite Home Economics 30. Includes the planning and selection of household furnishings from both the artistic and practical standpoints. This is accomplished through the solution of definite furnishing problems on the campus. Second year.

Home Economics 30 (Applied Art): 5 hours. Two lectures and three laboratories. A course designed to develop art appreciation and good taste through the application of art principles to everyday life. Special emphasis is placed on the solution of problems found in clothing and the home. First year.

Home Economics 101 (Introduction to Home Economics): 5 hours. A course offered for freshmen in home economics to help them make the best use of their opportunities in college as well as introducing them to the opportunities in the field of home economics. First year.

Home Economics 220 (Clothing): 5 hours. Two lectures and three laboratories. Prerequisite Home Economics 30. A course teaching the fundamentals of clothing based on wardrobe planning, identification, purchase and use of fabrics as well as garment construction. First year.

Home Economics 243 (Family Fundamentals): 5 hours. Open to men and women. A study of the problems and adjustments confronting young people both before and after marriage. Second year.

THE SCIENCE COURSES at Abraham Baldwin are taught from two approaches. The basic knowledge of science that should be part of the knowledge of a well-informed citizen is

taught as is the science with more direct applications to the problems of the farmer and home-maker.

Agricultural Economics 4: 5 hours. Five lectures or recitations. Farm arithmetic including land area calculations, depreciation, percentages, fertilizer formulae, and leading up to detailed methods and practical applications of economics as related to agriculture such as keeping, analyzing and interpreting farm records and budgets. First year.

Agronomy 10 (Soils). 5 hours. Four lectures and one laboratory. Covers study of soils as natural units with their inherent characteristics, practical significance of chemical and physical properties of soils, relationship between soils and plants and principles involved in the use of soil management practices on the soils of the southeast. Prerequisites Chemistry 21 and 24. Second year.

Biology and Health. 5 hours. Designed to give the students a survey of the fundamentals of human biology as it applies to personal and public health.

Botany 21: 5 hours. Four lectures and one laboratory. Foundation study of cells and tissues, structure and functions of plant organs, environment, and reproduction of seed bearing plants. First year.

Botany 22. 5 hours. Four lectures and one laboratory. The identifying characteristics and economic importance of the principal groups in each division of the plant kingdom, also a brief study of inheritance and plant classification. Special emphasis given to plant diseases. Second year.

Chemistry 21: 5 hours. Four lectures and one laboratory. A general course in the chemistry of non-metallic elements. Prerequisite Algebra. Second year.

Chemistry 24: 5 hours. Four lectures and one laboratory. Inorganic chemistry. Continuation of Chemistry 21, including general survey of subjects related to agriculture. Prerequisite Chemistry 21. Second year.

Mathematics 101. 5 hours. Five lectures or recitations. Women. Survey course. Covers arithmetic, plane geometry and algebra as taught in high school. Emphasis is on arithmetic. First year.

Mathematics 111: 5 hours. Five lectures or recitations. Trigonometry. Special emphasis on logarithms.

Mathematics 224: 5 hours. Five lectures or recitations. College algebra. Designed for students with little or no preparation in algebra. Special emphasis on fundamentals. First year.

Physics 20: 5 hours. Four lectures and one laboratory. Brief study of elements of physics as might be applied in rural life, emphasis placed on the more practical phases. Problems apply to farming or home-making. Second year.

THE ARTS. English and Social Science are taught from the standpoint of the well-informed citizen. The literature and social problems of rural life are given special emphasis.

English 101: 5 hours. Five lectures or recitations. A review of grammar, a systematic enlargement of the student's vocabulary, constant practice in writing and analyzing sentences and paragraphs. First year.

English 102: 5 hours. Five lectures or recitations. Prerequisite English 101. Continuation of English 101 with special attention to exposition, narration, and description, and with emphasis on the research paper. A book of readings is used to provide models and to stimulate the student's thinking. First year.

English Literature 201 and 202. 10 hours. Five lectures or recitations. Designed to develop in the student some knowl-

The Dining Hall

edge and appreciation of literature, music, painting, sculpture and architecture. Second year. Women.

English 203 (Speech): Prerequisites English 101 and 102. 5 hours. Five lectures or recitation. Spoken English in informal conversation and oral presentation of the formal types of discourse. Special emphasis placed on speaking before groups. Second year.

Political Science I: 5 hours. Five recitations or lectures. Brief but comprehensive study of Georgia as a state and as one of the United States through the medium of the Constitutions of the United States and of Georgia. A further look into Georgia as it is today, using the latest statistical information, current problems, and current history. Second year.

Social Science: 5 hours. Five lectures or recitations. A brief study of the historical, political, economic and social factors molding modern civilization. First year.

PHYSICAL EDUCATION FOR MEN AND WOMEN

The physical education program is directed in its entirety towards the enrichment of experience through activities and in situations that conserve and promote the health and physical powers of the students; it cooperates in the removal of health handicaps, and remedial defects, and contributes a major share toward laying a foundation for positive health through desirable health habits. Two quarters each year are required of freshmen and sophomores.

ELECTIVE COURSES IN AGRICULTURE

When a sufficient number of students to justify a class request that a particular agricultural subject be taught, it will be offered. Below are given electives which the college will offer:

Beef Cattle: Prerequisite, Animal Production. 3 hours. A further study in breeding, feeding and management of beef cattle.

Dairying: Prerequisite, Animal Production. 3 hours. A further study of breeding, feeding and management of the dairy herd. Special work is done in the manufacture of butter, cheese and ice cream.

Poultry: 3 hours. A detailed study of the problems in the successful growing of poultry for meat and for egg production.

Swine: Prerequisite, Animal Production. 3 hours. A further study of breeding, feeding, and management of the swine-herd. Particular emphasis is placed on the year-round hogging-off of crops as developed at the Georgia Coastal Plain Experiment Station.

Farm Shop: 3 hours. A practical course in shop work, including carpentry, forge, metal, and welding.

Food Preservation: 5 hours. One recitation and two laboratory periods. An introduction to the field of food preservation with special emphasis on the standards, principles, and practices of canning and freezing fruits, vegetables and meats. Also designed to teach students the technique and skills necessary in cutting beef, pork and poultry suitable for markets, locker plants and home use.

Special Field Crops of the Coastal Plain: 3 hours. Prerequisite Crop Production. Designed to study in greater detail those crops limited or practically limited to the coastal plain area as tobacco, peanuts, sugar cane, etc.

(Students pursuing courses leading to a degree in agriculture may take any elective subjects offered terminal students. Credits in these elective courses are not transferrable. Although 108 hours are required for graduation at this college, only 106 credit hours may be transferred to a senior college of agriculture.)

OUTLINE OF COURSES IN AGRICULTURE

(Minimum Abraham Baldwin Agricultural College requirements for students seeking a degree in agriculture.)

FIRST YEAR

Agricultural Economics 4	5 Quarter Hours

Abraham Baldwin Agricultural College

APPLICATION FOR ADMISSION

(Attach transcript of credits)

Date _____

Name _____

Address _____

Name of Parent
or Guardian _____

Occupation of Parent
or Guardian _____

Previous Agricultural or
Home Making Training _____

Check below the quarter you expect to enter:

- ☐ Fall
☐ Winter
☐ Spring
☐ Summer

Are you a Veteran? _____ P.L. 346 _____ P.L. 16 _____

If you took part in basketball, glee club, dramatic club, or other extra-curricular activities in high school, please indicate on line below:

Name two persons who will recommend you:

Name _____ Address _____

Name _____ Address _____

A fee of \$10.00 must accompany each application for admission submitted by all new students and all former students desiring to be readmitted after an absence of one or more quarters, including the summer quarter. This fee will be refunded if application is denied, or if requested by the applicant not less than 30 days prior to the scheduled registration date. When the student completes his registration, the \$10 fee will be applied to his account.

Mail to:
